SUMMARY

Software Engineer with 5.5 years of experience in full-stack web development, specializing in React.js, Node.js, and AWS. Skilled in designing scalable, high-performance applications, optimizing workflows, and enhancing test coverage. Passionate about automation, efficiency, and team leadership to deliver robust, high-quality solutions.

WORK EXPERIENCE

Software Engineer - II, Nike

July 2025 - Present

- Optimized bulk export system - **Reduced CSV/Excel export time from ~1 hour to under 2 minutes** through parallel processing and data-fetching re-architecture.
- Integrated Splunk analytics with customizable dashboards, enabling product teams to track adoption, material usage, and user behavior in real time.
- Led AWS OpenSearch Serverless migration - Achieved zero downtime and zero data loss across services, reducing infrastructure costs and eliminating manual cluster management.
- Built a config-driven schema system for material types using JSON Schema, allowing new categories to be added without frontend code changes.
- End-to-end workflows for supplier assignment, lifecycle tracking, approvals, cost tracking, notifications, and chat - establishing the single authoritative source of truth.
- Designed a natural language search engine - Enabled intuitive material discovery by translating everyday queries (e.g., "lightweight breathable mesh") into structured OpenSearch results.

Senior Software Engineer, Accenture

Jan 2021 - June 2025

- Collaborated with clients and architects to design scalable solutions, enhancing system performance by **30%**.
- Led a team of 5 engineers to develop a web application that automated Postman test conversions to Playwright, reducing manual effort by **98%** and **winning 1st place in the Hackathon**.
- Increased backend unit test coverage to 100%** and UI coverage to **80%**, improving software reliability.
- Implemented an automation script using selenium for one of the applications resulting in a 90% reduction in time and Optimized test execution by 85% by developing a Playwright-based framework, enabling concurrent policy generation.

TECHNICAL SKILLS

HTML, CSS, JavaScript, Typescript, React, AWS, NodeJS, NextJS, Tailwind, Terraform.

PROJECTS

- [Hired](#) - A web application designed to streamline the job search process.
- [Forecast-Fusion](#) - An analytics tool that provides users with accurate and up-to-date weather forecasts by using weather API, Recharts to display weather trends through dynamic graphs and charts and TanStack Query for optimized API calls.
- [Splitz](#) - A web application to simplify the management of shared expenses among friends, family & colleagues.
- [MemeScroll](#) - provides users with an endless stream of memes through an intuitive infinite scrolling interface.
- [YouTube Clone](#) - It is a static web application that displays a curated list of YouTube videos

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate**
- AWS Certified Developer – Associate**
- Microsoft Certified: Azure Administrator Associate
- Microsoft Certified: Azure Developer Associate
- Microsoft Certified: Azure Fundamentals
- Microsoft Certified: Security, Compliance & Identity Fundamentals
- Microsoft Certified: Azure Data Fundamentals
- Microsoft Certified: Azure AI Fundamentals
- Microsoft Certified: Power Platform Fundamentals

AWARDS/ACHIEVEMENTS

- 1st place in Hackathon (Project-wide)
- FY25 NorthStar Award (NA level)
- FY24 NA Amplify Award (NA level)
- FY23 ACE Award (Highest Recognition)
- FY23 Shared Success Award (NA level)
- FY22 Xtramile Award (Project level)

(Note: **NA** stands for **North America** Market)

EDUCATION

NMAM Insititute of Technology

Bachelor of Engineering

CGPA:8.59

2016 - 2020

LANGUAGES

English, Hindi, Kannada, Konkani.
